

NEMA-3R

Patent-Pending

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

## Lux-Ray™ LED Series

### Features

- Die-Cast aluminum housing, available in four finishes: dark bronze, off-white, black, and platinum gray
- Nema-3R rated for indoor/outdoor wet, damp & cold locations:  
 -20 to 50°C (-4 to 122°F), SD Model  
 -20 to 40°C (-4 to 104°F), ACSD Model
- Wall-mount installation on various junction boxes or via rigid conduit
- Patent-Pending design for easy installation: wall-mount back plate includes electrical wire box with snap-on connector
- Patent-Pending light engine: four power LEDs with redundant connections and wide beam
- Clear polycarbonate lens of reduced size (3" X 1.5"), shock absorbent and UV-resistant
- Battery: environmentally friendly high-temperature rated, Nickel-Metal Hydride technology
- Power consumption in stand-by: less than 5W
- Optional self-test and diagnostic functions, operated by micro-controller
- 5-year limited warranty

### Optional Features

- Cold weather: -40°F / -40°C
- Forward-throw light distribution, for applications of outdoor exit discharge (OSHA 1910.36)
- High-lumen output: 25 to 50% additional level of illumination compared to the regular unit
- Dual-mode operation: normal lighting and/or emergency lighting with separate AC inputs
- Photo-switch: dusk-to-dawn control of normal lighting
- Remote test: infrared remote control (keypad ordered separately)
- Time Delay: 5, 10, 15 minutes

### Dimensions

Dimensions are approximate and subject to change.

## Die-Cast Aluminum LED Emergency Lighting

SPEC GRADE

ARCHITECTURAL

### Photometry performance

Whether installed indoors or outdoors, with spacing measurements for a single unit or between two units center-to-center, the Camray® Series LED delivers a stable and consistent illumination making it easy to specify in a wide range of applications. The outstanding spacing of illumination ranges from 50 to 70 feet for standard units (wide beam) and from 40 to 50 feet with the forward-throw beam option.

### Minimum of 1 foot-candle

TABLE B: SPACING FOR MINIMUM ILLUMINATION = 1FC			
Model Type	Mounting Height	Width X Length (ft)	
		Single Unit	Center-To-Center
Standard	9'	4' x 28'	4' x 32'
With option -H	11'	4' x 32'	4' x 40'
With option -FT	12'	4' x 22'	—
With option -FTH	15'	4' x 27'	—

### Average of 1 foot-candle

## Revelation™ Series

### Virtually Invisible Emergency Lighting

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

### Features

- Fully concealed in open cavity walls or ceiling
- Only visible when needed: during a power failure
- Each unit comes with two (2) MR16 halogen lamps ranging from 12 to 50W each or 2 MR16 style LED lamps
- The Self-Powered unit is contained in a heavy-duty galvanized steel back box that can be concealed in the wall or ceiling and includes a combined test switch and pilot light that is accessible through the frame
- The normally exposed parts of the unit (flat door and frame) are covered with a high-quality powder-coated, textured off-white finish that integrates well with most wall and ceiling paints. The surface finish can also be customized on site with paint, wallpaper or other coverings
- Power requirements: 120/277VAC, 60Hz, 0.25/0.12A
- PulsePlus Charger circuitry offers 120/277VAC 60Hz, 0.25/0.12A, automatic charger, built around a micro-controller integrated circuit. Circuit standard features include current limiting, temperature-compensated cut-off voltage, brownout transfer, low-voltage battery disconnect and battery lock out (prevents activation in DC mode until initial AC activation)
- Special bar hangers for installation in sheet rock or T-bar ceilings are included. The included electrical junction box can be installed on a wall stud or ceiling beam with a simple U-shape bracket
- 5-year warranty on electrical parts (motor, electronic circuitry). Each unit is fully computer-tested and aligned mechanically for optimum operation

### Diagnostic/Self Test Feature (optional)

Diagnostic/Self-Test circuitry is optional on all Self-Powered models. This circuitry is programmed to ensure equipment readiness and reliability by continuously monitoring every critical function of the unit. If a problem occurs, the pilot light located on the front of the unit will change color from solid green to flashing red, indicating a fault. A detailed diagnostic legend is available on the door back and provides fault identification (battery, charger circuitry, lamps) for maintenance personnel. The self-test feature will simulate a power loss for a minimum of 30 seconds every 30 days, 30 minutes every 6 months and 90 minutes annually.

### Power Consumption

Model	Maximum		Stand-By*	
	Input Current	Input Power	Input Current	Input Power
120V	0.25A	30W	0.1A	11W
277V	0.12A	30W	0.05A	11W

\* Stand-by power consumption is 50% lower for Lead-Calcium batteries.

## THE UNSEEN SOLUTION

### Virtually Invisible Emergency Lighting

### Features

- Each unit comes with two (2) MR16 halogen lamps or 2 MR16 style LED lamps
- The Self-Powered battery unit is contained in a heavy-duty galvanized steel back box that can be concealed in the wall or ceiling and includes a combined test switch and pilot light that is accessible through the frame
- The normally exposed parts of the unit (flat door and frame) are covered with a high-quality powder-coated, textured off-white finish that integrates well with most wall and ceiling paints. The surface finish can also be customized on site with paint, wallpaper or other coverings
- Power requirements: 120/277VAC, 60Hz, 0.25/0.12A
- PulsePlus Charger - this automatic charger is built around a micro-controller integrated circuit. Circuit standard features include current limiting, temperature-compensated cut-off voltage, brownout transfer, low-voltage battery disconnect and battery lock out (prevents activation in DC mode until initial AC activation)
- The equipment includes an electrical junction box and can be installed on a wall stud or ceiling beam with a simple U-shape bracket.
- Evaluated to UL 924 Standard
- 5-year warranty on electrical parts (motor, electronic circuitry). Each unit is fully computer-tested and aligned mechanically for optimum operation
- AD or ADNA options include a Time Delay function. If needed, it can be enabled/disabled in the field or it can be preset at the factory by including the suffix AD-D\_ or ADNA-D\_

## PS Series

### 6 and 12 Volt Square Shooter

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

### Features

- Each unit (standard) comes with one (1) halogen lamp (6V-6W or 12V-8W)
- Surface mount, semi-recessed units and fully recessed kits are constructed of an off-white, impact resistant, flame retardant, polymeric material. Fully-recessed, "FRM" option units have an all-metal back box
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, or Lead-Calcium batteries
- PulsePlus Charger circuitry offers 120/277VAC 60Hz., 0.3/0.15A (other inputs available), fused output circuit(s), temperature compensated charger, sealed relay, low voltage battery disconnect, brownout protection and lock out (automatic battery connect)
- All models are supplied with a specular reflector and are designed to mount directly to a standard octagonal electric box
- UL Listed. Complies with NEC, Life Safety Code and OSHA. Approved use in the Commonwealth of Pennsylvania
- 3-year full warranty, excluding lamps, pilot lights and fuses

### Unit Rating

## 6 and 12 Volt Decorator Recessed Emergency Lighting

SPEC GRADE

ARCHITECTURAL

### Features

- Each unit comes with two (2) 6 or 12V-9W high-intensity incandescent EF-9 lamp heads (standard). EF-10, EF-18, EF-32 and EF-150 lamp heads are optional
- Constructed of 20-gauge steel with an off-white baked enamel finish
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, or Lead-Calcium batteries
- PulsePlus Charger circuitry offers 120/277V input 60 Hz., 0.3/0.15A (other inputs available), fused output circuit(s), dual diagnostic indicator lights, temperature compensated charger, sealed relay, low voltage battery disconnect, brownout protection and lock out (automatic battery connect)
- Fully-recessed assembly for ceiling or wall mount. Includes adjustable bar hangers for grid ceilings. Can be framed into studs/joists
- UL924 Listed. Complies with NEC, Life Safety Code and OSHA Approved use in the Commonwealth of Pennsylvania and New York City
- 3-year full warranty, excluding lamps and fuses

### 6, 12 and 24 Volt T-Bar Units

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

### Features

- Each unit comes with two (2) off-white EF-18 lamp heads (standard) with one 9W wedge-based lamp per head. Provisions for mounting three heads are included
- Constructed of 20-gauge steel with an off-white baked enamel finish
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, or Lead-Calcium batteries
- PulsePlus Charger circuitry offers 120/277V input 60Hz., 0.3/0.15A (other inputs available), fused output circuit(s), dual diagnostic indicator lights, temperature compensated charger, sealed relay, low voltage battery disconnect, brownout protection and lock out (automatic battery connect)
- Fully-recessed housing for unobtrusive use in T-Bar ceilings. A removable cover on the back box allows for ease of installation and full access to the battery and charger
- UL Listed. Complies with NEC, Life Safety Code and OSHA. Approved use in the Commonwealth of Pennsylvania and New York City
- 3-year full warranty, excluding lamps, pilot lights and fuses

NOTE: For a complete list of available lamp types, please refer to the lamp data on pages 146-147

\* Available with EF10 and EF150 lamp heads only

\*\* Available with the EF18 lamp head only

\* Minimum lamp load required: 20% of unit capacity Not available with 100W Ni-Cd 24V

Example: **BTSC17-210L\_-AD**

## EFR2™ Distinction Series

### Self-Powered Recessed Down Light

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

#### Standard Features

- One 6V-6W MR16 halogen lamp can be adjusted by rotating the gimbal through 359° in azimuth and or positioning the lamp through 90° in pitch
- The recessed gimbal is constructed of durable, powder-coated, Die-Cast aluminum. A metal, fully-recessed back box houses the electronics, battery and wiring
- Self-Powered. Sealed long-life Nickel-Cadmium battery for operation of at least 90 minutes as required by NFPA 101 Life Safety Code
- Power requirements: 120V, 60Hz, 0.046A, 4.17W; 277V, 60Hz, 0.024A, 4.76W
- Operation is completely automatic. A brownout sensitive transfer circuit automatically connects the emergency lamp upon either complete loss of normal AC power or when the AC voltage drops down to a point where normal AC lighting will not function. The unit also monitors DC battery voltage and disconnects the lamps before the battery can go into deep discharge (in conditions of extended power failures). When the AC power is restored the charger automatically returns the battery to full charge in 24 hours, and monitors the battery to maintain full charge
- Includes bar hanger kit. Quick disconnect feature allows the contractor to easily install the trim on the housing
- Easy to access for maintenance personnel
- Evaluated to UL 924 standards

#### Unit Data

The recessed gimbal is constructed of a durable, powder coated, Die-Cast aluminum and is furnished with an MR16 lamp source powered by a sealed Nickel-Cadmium battery. The unit will be furnished with a metal, fully recessed back box to house the electronics, battery and all associated wiring. Furnished standard with bar hanger kit.

The light source shall be adjusted by rotating the gimbal through 359° in azimuth and or positioning the lamp through 90° in pitch.

The light source will be 6 volts 6 watts MR16 halogen lamp. The emergency lighting fixture will provide illumination in the emergency mode directly from the internally mounted Nickel-Cadmium battery. The duration of operation provided by the Nickel-Cadmium battery will be no less than 90 minutes as required by NFPA 101 Life Safety Code.

#### Dimensions

Dimensions are approximate and subject to change.

EFR2 Series including back box

#### Charger

Electrical power requirements:

120V, 60Hz, 0.046A, 4.17W  
 277V, 60Hz, 0.024A, 4.76W

Transfer: Dust tight relay automatically and instantly energizes lamp load upon failure of AC supply.

Battery protection circuit automatically shuts down lamp load when battery reaches 87-1/2% of its rated voltage. Charger is 100% solid state, includes auto-equalize, temperature compensation and is controlled by a 1% Zener reference.

## GS Series 6 Volt Recessed Down Light

SPEC GRADE

ARCHITECTURAL

### Standard Features

- An adjustable gimbal directs the light from one (1) 6V wedge-base PAR 36 lamp head
- The low-profile trim ring is molded in tough polycarbonate with a semi-gloss white finish to complement a variety of ceilings. The fully-recessed back box is constructed of 20-gauge steel
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, or Lead-Calcium batteries
- PulsePlus Charger circuitry offers 120/277VAC 60 Hz., 0.3/0.15 Amp, fused output circuit(s), long life LED pilot indicator, temperature compensated, sealed relay, low voltage battery disconnect, brownout protection and lock out (automatic battery connect)
- Inconspicuously mounted and easily accessed. The test switch and LED pilot light are located on the side of the lamp ring on the standard unit
- A slide-out chassis and two quick-connect plugs make installation and servicing easy. Adjustable bar hangers included
- UL Listed. Complies with NEC, Life Safety Code and OSHA
- 3-year full warranty, excluding lamps, pilot lights and fuses

### Accessories (order as separate item)

## Prestige™ Edge-Lit Series

### Die-Cast Aluminum Edge-Lit Exit Sign

#### Design upgrade: introducing new features

1. Easier installation: component-free back-box housing and canopy can be installed in advance, like a regular junction box.
2. 20 – 30% less power consumption: max. 1.4W (AC-only models) and max. 2.3W (Self-Powered)
3. Bi-color LED pilot light allows visual diagnostic without the need to open the unit (self-test and diagnostic option)
4. Listed by the Underwriting Laboratories UL Listed
5. Also available with white LEDs for custom-design legends: pictograms, special wording, etc. (Ask your sales representatives)

#### Features

- Designed to achieve superior visual clarity and performance with a red and green LED light source.
- Clear acrylic panel provides optimum light transmission. Illumination is 100% in both AC and emergency mode.
- Computer engraving is used to crisply define each letter and chevron. LED sensitive inks are formulated to provide a rich color in red or green. Choice of legend background includes clear (for single face), white or mirror (for single or double face signs).
- Clean trim plate design eliminates visible fasteners. Choice of trim plates: circular or angular. Standard finish is brushed aluminum for the housing, trim plate, trim ring and canopy.
- Self-Powered models contain a sealed maintenance-free Nickel-Cadmium battery that provides 90 minutes of emergency illumination.
- Two-wire universal 120 through 277VAC, 50/60Hz for AC-only and Self-Powered models. AC-only signs consume maximum 1.4W. Self-Powered signs use 2.3W max while recharging batteries. Solid state transfer automatically and instantly supplies the LED lamps from the back-up battery upon failure of AC supply. Close tolerance electronic circuit activates emergency unit when utility power dips below nominal voltage for brownout protection. Current-limited and short-circuit-proof charger. Full battery recharge is made in compliance with UL924 specifications. Test switch incorporates a green LED AC pilot light.
- Self-test and silent diagnostic is optional on all Self-Powered models. It is programmed to ensure product readiness and reliability by continuously monitoring every critical function of the unit. The unit is self-tested for one minute every 30 days, 30 minutes every 60 days and 90 minutes annually. When a fault is detected the pilot light will change color from green to red and blink following a particular code, identifying the cause: battery, charger circuitry, or LED lamps.
- Modular design allows for several mounting configurations. A trim ring and two 27-inch bar hangers are used for recessed mounting on walls or ceilings. A canopy allows for surface mounting on ceilings or walls as back- or end-mount. Face panels snap securely into trim plate on all mounting configurations.
- UL listed to UL 924 Standard.
- 5-year full warranty.

#### Electrical

Power requirements: 120 to 277VAC, 50/60Hz. AC-only signs use 1.4 watts max, Self-Powered signs use 2.3 watts max while recharging batteries

#### Available Models

Circular trim plate models shown.  
optional Angular trim plate available.

### Edge-Lit Recessed Ceiling-Mount Only

### Exit Sign

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

#### Design upgrade: introducing new features

1. Easier installation: component-free back-box can be installed in advance, like a regular junction box
2. 20 – 30% less power consumption: max. 1.4W (AC-only) and max. 2.3W (Self-Powered)
3. Bi-color LED pilot light allows visual diagnostic without the need to open the unit (self-test and diagnostic option)
4. Listed by the Underwriting Laboratories UL Listed
5. Also available with white LEDs for custom-design legends: pictograms, special wording, etc. (Ask your sales representative)

#### Features

- Designed to achieve superior visual clarity and performance with an LED light source. High brightness red or green LEDs transmit light directly into both ends of a unique U-shaped panel. LED sensitive inks are formulated to provide a rich color in red or green
- Clear acrylic panel provides optimum light transmission. Illumination is 100% in both AC and emergency mode
- Clear acrylic panel is silkscreened and computer engraved. Computer engraving is used to crisply define each letter and chevron. LED sensitive inks are formulated to provide a rich color in red or green. Choice of legend background: clear (for single face), white or mirror (for single or double face signs)
- Rugged cast brushed aluminum trim plate (optional colors available).
- Low energy consumption LED lamps consume less than 2.3W per sign, single or double face, AC-only or Self-Powered
- Available with sealed maintenance-free Nickel-Cadmium batteries.
- Fully automatic charger circuitry offers two-wire universal 120 to 277VAC input, temperature compensated charger, solid state transfer, low voltage battery disconnect, and brownout protection
- Self-test and silent diagnostics are optional on all Self-Powered models. Diagnostics are programmed to ensure product readiness and reliability by continuously monitoring every critical function of the unit. The unit is self-tested for one minute every 30 days, 30 minutes every 60 days and 90 minutes annually. When a fault is detected the pilot light will change color from green to red and flash following a particular code, identifying the cause: battery, charger circuitry, or LED lamps
- Designed to fit integrally with a 20 gauge steel back box. Each unit includes a bar hanger kit
- UL listed to UL 924 Standard
- Prestige LED Series signs are unaffected by the vibrations, ambient temperature swings and typical power surges detrimental to standard exit light sources
- 5-year full warranty

## Prestige™ DX Series

### Die-Cast Exit Sign

SPEC GRADE

ARCHITECTURAL

### Features

- Red and green LED light source
- Constructed of Die-Cast aluminum. Finished with a deep brushed face and black body. Optional finishes available. Self Contained. Batteries and circuitry are located inside the exit housing
- Available with sealed maintenance-free Nickel-Cadmium batteries that provide 90 minutes of emergency operation. Batteries recharge per UL924 requirements
- Fully automatic charger is solid state. All models are Universal 2-wire, 120 through 277VAC, 50/60Hz
- Continuous self-diagnostic monitoring. Self-testing per Life Safety Code requirements. Diagnostic / Self Test circuitry is standard on all Self-Powered models. This circuitry is programmed to ensure the exit's readiness and reliability by continuously monitoring every critical function of the unit. If a problem occurs, a single "service required" indicator illuminates immediately. A detailed diagnostic display that will further indicate the nature of the fault is located on the inside of the exit sign, out of sight from the general public. The self test will test the unit for a minimum of 30 seconds every 30 days, 30 minutes every 60 days and 90 minutes annually
- Can be wall, end or ceiling mounted
- Evaluated to UL 924 Standard. AC-Only Signs are Listed for use in damp locations
- Unaffected by the vibrations, ambient temperature swings and typical power surges detrimental to standard exit light sources
- Universal directional chevron knockouts are completely concealed and easily removed from the face plate
- 5-year full warranty

# Prestige™ Floor Proximity Series

## Master with Remote Exit Sign

### Standard Features

- Low energy consumption LED light source (see Power Consumption chart). Red and green LEDs provide excellent visual performance, high reliability and low maintenance costs
- Self-Powered Master Units have self-contained batteries and circuitry inside the housing
- Available with sealed maintenance-free Nickel-Cadmium batteries for superior performance and long life. Provides 90 minutes of emergency operation and remote power for Proximity EXIT sign
- Remote Floor Proximity EXIT signs have power and diagnostics supplied from the DX/DXN Series Master Units only
- Stand alone AC-Only and Self-Powered Units: 120/277VAC dual voltage
- Master EXIT sign comes standard with the Self-Test/Diagnostic Feature. Its circuitry also monitors and supplies diagnostics to the Remote Floor Proximity EXIT sign. The self-test/diagnostic feature continuously monitors the charger assembly, battery and LED assembly current. If a fault is indicated, the "external service" required indicator will illuminate. The internal fault indicators will then indicate the nature of the fault. The self-test diagnostic will self test for minimum 30 seconds every 30 days, 30 minutes every 60 days and 90 minutes annually. Meets NFPA 101 Life Safety Code requirements for periodic testing
- Available for surface or recessed mounting at floor level
- Evaluated to UL 924 Standard for floor proximity applications
- 5-year full warranty. Each unit is fully tested
