**nexus** NEMA-4X

## Survive-All™ SV Series

NEMA-4X, NSF, Vandal-Resistant Housing  
 Battery Unit

### Features

- Equipped with a tool-less MR16 swivel lamp assembly to provide precise beam control. Choice of MR16 LED or halogen lamps of 6V and 12V
- Fully gasketed cast aluminum back plate with clear, UV resistant polycarbonate cover. Tamper-proof screws and bit are included. Available in black, white or gray
- Standard temperature 50°F to 104°F (10°C to 40°C).
- Available with sealed, maintenance-free Nickel-Cadmium (UL Listed for damp and wet locations), or Lead-Calcium batteries
- Standard 120/277VAC 0.3/0.15A input. Non-audible advanced diagnostic charger board, 15 minute Time Delay and lamp disconnect. Audible warning and Time Delay functions can be enabled or disabled during installation. Non-obtrusive, magnetic test switch. Micro-controller diagnostic system tests, detects and indicates battery, charger circuitry or MR16 lamp failures.
- Wall, strut or beam mounting
- UL Listed. Certified to meet UL924 standards, 90 minutes of emergency operation, NEMA-4X rated for high abuse areas, wet locations and cold weather (-40°F/-40°C) applications, NSF Certified for use in food processing plants
- 3-year full warranty, excluding lamps and fuses

### Dimensions

Dimensions are approximate and subject to change.

### Universal Bracket

PMK KIT  
(screws included)

BEAM MOUNTING

STRUT MOUNTING

### Accessories (order as a separate item)

DESCRIPTION	PART NUMBER
Additional special bit for tamper-proof screws	690.0454-E
Universal bracket (for mounting on poles, I-beams or strut metal framing)	PMK-E

### Applications

- Hosedown areas / car washes
- Food processing / preparation facilities
- Marine locations
- Chemical plants
- Schools and other public facilities
- Parking garages
- Food processing / preparation facilities
- Transit platforms
- Sports arenas / swimming pools
- Security areas / prisons
- Warehouse and cold storage facilities
- Heavy industrial facilities

Note: Units installed outdoors must be in a shaded area (Lead-Calcium batteries)

## Survive-All™ SVX Series

NEMA-4X, Vandal Resistant and Harsh Environment Combination Unit

### Features

- Each unit comes with two (2) MR16 high intensity lamps (standard). Fully field-adjustable lamp head assembly offers the option of selecting either a halogen lamp or a high efficiency white LED light source for optimum illumination over the path of egress. Exit light source LED
- Rugged PVC body will not dent, peel or corrode. The sealed faceplate is constructed with a heavy duty, vandal-resistant polycarbonate cover and fastened with stainless steel tamper-resistant screws
- Available with sealed, maintenance-free Nickel-Cadmium batteries
- This circuitry is programmed to ensure the exit combination unit's readiness and reliability by continuously monitoring every critical function of the unit. If a problem occurs, a single "Service Required" indicator illuminates immediately. A detailed diagnostic display that will further indicate the nature of the fault is located on the inside of the exit sign, out of sight from the general public. The self test will check the unit for a minimum of 30 seconds every 30 days, 30 minutes every 60 days and 90 minutes annually. PulsePlus Charger circuitry offers 120/277 volt input 60 Hz, 0.3/0.15 Amps (other inputs available), fused output circuit(s), dual diagnostic indicator lights, temperature compensated charger, sealed relay, low voltage battery disconnect, brownout protection and lockout (automatic battery connect). Magnetically operated test switch
- Can be wall, end or ceiling mounted
- NEMA 4X\* Rated. UL Listed. Listed for wet and Damp Locations 50°F to 104°F (+10°C/+40°C)
- 5-year full warranty, excluding lamps and fuses

\* Nema-4X Certified for wall or ceiling mounting only

# Survive-All™ SVX Exit Series

NEMA-4X Rated and UL Listed for Wet and Damp Locations

SPEC GRADE

INDUSTRIAL

## Features

### Reliability

The Survive-All™ SVX Series has a 5-year full warranty.

### Unit Data - NEMA-4X\* Rated

Rugged polyvinyl chloride body will not dent, peel, rust or corrode. The sealed faceplate is constructed of heavy duty, vandal-resistant polycarbonate and features an evenly illuminated legend. The fully gasketed faceplate is fastened with stainless steel tamper-resistant screws. Magnetically operated test switch. Models can be wall, end or ceiling mounted. Legend and chevron complies with UL and CSA requirements.

**Survive-All™ SVX Series** signs are unaffected by the vibrations, ambient temperature swings and typical power surges detrimental to standard exit light sources.

NEMA 4X\* Rated. UL Listed. Listed for wet and Damp Locations 50°F to 104°F (+10°C/+40°C)

\* Nema-4X Certified for wall or ceiling mounting only

## Dimensions

Dimensions are approximate and subject to change.

## High Performance Circuitry

- Self Contained – Batteries and circuitry located inside the exit housing.
- Continuous self-diagnostic monitoring and monthly self testing.
- Fully automatic charger is solid state.
- AC, AC/DC and Self-Powered Models have universal, 2-wire input 120V to 277VAC 50/60 Hz.
- Sealed, maintenance-free Nickel-Cadmium battery provides 90 minutes of emergency operation.
- Battery recharges per UL924 requirements.
- Each unit comes standard with one tamper-proof driver bit.

## Power Consumption (LED Exit Signs)

## Survive-All™ EF39 & EF40 Series

EF39: NEMA-4X &amp; NSF Certified

EF40: Vandal Resistant

### Features

- Fully gasketed with a selection of cast aluminum or polycarbonate back plate
- Clear polycarbonate UV and impact resistant-lens
- Choice of single or double lamp models
- Available in 6, 12 and 24V models MR16 or LED
- Easy lamp replacement
- EF39 comes standard with tamper-proof screws and bit
- NSF Certified for food processing plants
- NEMA-4X Certified
- EF39P and EF40P require mounting plate option when installed on surface mount junction box
- CSA Certified to C22.2 No. 141
- Suitable for indoor/outdoor installation

## HZM Series

6 and 12 Volt, Class I Division 2,  
 Group A, B, C & D

SPEC GRADE

INDUSTRIAL

### Features

- Each unit comes with two (2) weather-resistant, impact-resistant, flame-retardant thermoplastic EF-11 lamp heads with 12 watt high intensity sealed beam tungsten halogen lamps (standard)
- Temperature code: T4A (max. 248°F/120°C)
- Water and corrosion-resistant cabinet is made of fiberglass-reinforced polyester. Industrial gray cabinet is fully gasketed around the cover. Battery compartment is vented with a breather vent designed to permit exhaust of battery gases without admitting external moisture or corrosives
- Available with sealed, maintenance-free Lead-Calcium batteries
- Fully automatic pulse charger offers 120/277VAC, 60Hz, 0.43/0.2 A, limited current temperature compensation, short circuit proof, reverse polarity protected, low voltage battery disconnect, brownout protection and standard solid state transfer feature
- PAR36 sealed-beam halogen lamps (see lamp selection chart below)
- Standard Self-Diagnostic circuitry continuously monitors every critical function of the unit. If a problem occurs, a single fault indicator on the outside of the fixture flashes immediately. A detailed diagnostic display is located internally. The detailed display will further indicate the nature of the fault as either a battery fault, load fault or a charger fault
- UL Listed. Complies with NEC, Life Safety Code and OSHA. The test switch and AC pilot light are explosion proof in design and exceed requirements for Class I, Division 2, Group A, B, C & D
- 3-year full warranty, excluding lamps, pilot lights and fuses.

## Survive-All™ SVH Series

### Hazardous Location Battery Unit

#### Features

- Evaluated to the UL 844 Standard for Class I Division 2, Groups A, B, C and D
- A range of lamp ratings are available for different temperature codes
- Evaluated to the UL924 Standard
- Certified for use in Damp and Wet locations.
- Ambient temperature: 10... 40°C (50... 104°F)
- Advanced Diagnostics option available
- Lead-Calcium batteries are sealed, maintenance-free, with up to 72W emergency power
- Choice of MR16 LED or halogen lamps, shielded by a clear polycarbonate cover
- Two MR16 LED lamps illuminate up to a 60 ft path of egress
- Remote load capacity: illuminate up to a 420 ft path of egress with LED remote heads
- Polyvinyl chloride frame, with built-in gasket to prevent water infiltration
- Heavy-duty 1/8-inch thick aluminum back plate with keyholes for secure wall-mount installation
- Built-in microcontroller-based battery charger and self-test/self-diagnostic circuitry
- 3/4-inch electrical conduit entry on both sides and at the top

#### Dimensions

## Hazardous Location Combination and Emergency Battery Unit

SPEC GRADE

INDUSTRIAL

### Features

- Exit sign module is illuminated by long-life, energy-efficient LEDs. Fully field adjustable lamp head assembly comes standard with a selection of two (2) MR16 halogen lamps for optimum illumination over the path of egress. Lamps are shielded by a cast aluminum housing and a polycarbonate cover
- Rugged PVC body will not dent, peel or corrode. The sealed faceplate has a heavy-duty, vandal-resistant polycarbonate cover and is fastened with stainless steel tamper-resistant screws. The polyvinyl chloride frame has a built-in gasket to prevent water infiltration. The heavy-duty 1/8" thick aluminum back plate has keyholes for secure wall mount installation
- Available with sealed, maintenance-free Nickel-Cadmium, or Nickel-Metal Hydride batteries
- Fully automatic pulse charger offers 120/277VAC, 60Hz, current limiting temperature compensation, short circuit proof, low voltage battery disconnect, brownout protection and standard solid state transfer feature. The test switch is magnetically operated
- Advanced Diagnostic circuitry is standard on all Self-Powered models. This circuitry is programmed to ensure the combination unit's readiness and reliability by continuously monitoring every critical function of the unit. If a problem occurs, a single "Service Required" indicator illuminates immediately. A detailed diagnostic display that will further indicate the nature of the fault is located on the inside of the exit sign, out of sight from the general public. The self test will test the unit for a minimum of 30 seconds every 30 days, 30 minutes every 60 days and 90 minutes annually
- Designed for wall-mount installation only with a 1/2" electrical conduit entry on both sides and at the top.
- Evaluated to UL 924 standard and to UL 844 standard for hazardous locations: Class I Division 2, Groups A, B, C and D. A range of lamp ratings are available for different temperature codes
- 5-year full warranty, excluding lamps and fuses

## Survive-All™ SVX-HZ Series

### Hazardous Location Exit Sign

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

#### Features

- Energy efficient: consumes less than 2.5 watts in any configuration. Exit sign illuminated by long-life, energy-efficient LEDs.
- Single face heavy-duty 1/8" thick aluminum back plate. Polyvinyl chloride frame, with built-in gasket to prevent water infiltration. Will not dent, peel, rust or corrode. The sealed, heavy-duty, vandal-resistant polycarbonate faceplate features an evenly illuminated legend. The fully gasketed faceplate is fastened with stainless steel tamper-resistant screws. Self contained; batteries and circuitry are located inside the exit housing.
- Available with sealed, maintenance-free Nickel-Cadmium batteries that provide 90 minutes of emergency operation. Batteries recharge per UL924 requirements.
- AC and Self-Powered models have universal, 2-wire input 120V to 277VAC 50/60Hz.
- Tamper-resistant, hermetically sealed magnetic test switch for Self-Powered models.
- Diagnostic / Self Test circuitry is standard on all Self-Powered models. This circuitry is programmed to ensure the exit sign's readiness and reliability by continuously monitoring every critical function of the unit. If a problem occurs, a single "service required" indicator illuminates immediately. A detailed diagnostic display that will further indicate the nature of the fault is located on the inside of the exit sign, out of sight from the general public. The self test will test the unit for a minimum of 30 seconds every 30 days, 30 minutes every 60 days and 90 minutes annually.
- Can be wall, end or ceiling mounted. Comes standard with an industrial-grade, Die-Cast aluminum electrical box. 1/2" electrical conduit entry on both sides and at the top. Each unit comes standard with one tamper-proof driver bit.
- Legend and chevron comply with UL requirements. Evaluated to the UL 844 standard for Class I Division 2, Groups A, B, C and D, Temperature Code: T6 (maximum 185°F/85°C). Evaluated to UL 924 and UL1598 standards. Suitable for cold-weather: -4°F/-20°C (Self-Powered model, "CW" option) and -40°F/-40°C (AC only).
- 5-year full warranty

#### Dimensions

Dimensions are approximate and subject to change.

#### Power Consumption

Model	AC Specs		DC Specs	
AC-only red	120 to 277VAC	Less than 2W	—	—
AC-only green	120 to 277VAC	Less than 1.5W	—	—
Self-Powered red	120 to 277VAC	Less than 2W	Ni-Cd battery	Min. 90 minutes
Self-Powered green	120 to 277VAC	Less than 2.5W	Ni-Cd battery	Min. 90 minutes

\* Note: Cold-weather option does not consume additional power

## Remote Fixture for Hazardous Locations

SPEC GRADE

INDUSTRIAL

### Features

- Available with single or double lamp heads with high-efficiency MR16 halogen lamps of 10W, 12W or 20W (see How to Order information) and MR16 high-output LEDs (4W, 5W and 6W)
- Die-Cast aluminum back plate with gasket. Clear polycarbonate cover, UV and impact resistant
- Input voltage: 6V, 12V, 24V or 120V
- Easy installation on a 4" octagonal box (included). Comes standard with tamper-proof screws and bit
- Evaluated to UL 844 Standard for Class I Division 2, Groups A, B, C and D. Temperature Codes: T3B (10W and 12W MR16 lamps) and T2C (20W MR16 lamps) and T4A and T5 MR16 LED.
- Extreme operational temperature range: -40°F to +104°F (-40°C to +40°C)
- Indoor use
- Fully adjustable tool-less aiming swivel
- Tool-less easy lamp replacement
- Surface mount
- Conduit entry 1/2" NPT

### 6, 12 & 24 Volt Heavy Duty Industrial Emergency Power Unit

#### Features

- Each unit comes with two (2) impact resistant, flame retardant thermoplastic EF-18 lamp heads with 9 watt high intensity incandescent lamps (standard).
- All 20 gauge in steel construction ASA61 gray baked enamel finish.
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, Lead-Calcium (Free Electrolyte) or Lead-Calcium batteries.
- PulsePlus Charger circuitry offers 120/277 volt input 60 Hz, 0.3/0.15A (other inputs available), fused output circuit(s), dual diagnostic indicator lights, temperature compensation, sealed relay, low voltage battery disconnect, brownout protection and lockout (automatic battery connect).
- Provision for mounting to any standard 4" octagonal electrical box. The hinged and lockable front door allows easy access for maintenance and provides security against unauthorized access and vandalism.
- UL Listed. Complies with NEC, Life Safety Code and OSHA. Approved for use in the Commonwealth of Pennsylvania.
- 3-year full warranty, excluding lamps and fuses.

#### Dimensions

Dimensions are approximate and subject to change.

### High Impact Enclosure Power Unit

TYPE: \_\_\_\_\_

CATALOG #: \_\_\_\_\_

NOTES: \_\_\_\_\_

#### Features

- Each unit comes with two (2) 9W high intensity incandescent lamps (standard).
- Both the "S" and "L" enclosure are corrosion resistant. Both include separate battery compartments, fully gasketed door and stainless steel hardware. The "S" enclosure is constructed of high impact thermoplastic and the "L" enclosure is constructed of fiberglass and is NEMA 3R.
- Available with sealed, maintenance-free Nickel-Cadmium, Long Life Lead, Lead-Calcium (Free Electrolyte) or Lead-Calcium batteries.
- PulsePlus Charger circuitry offers 120/277 volt input 60 Hz, 0.3/0.15A (other inputs available), fused output circuit(s), dual diagnostic indicator lights, temperature compensation, sealed relay, low voltage battery disconnect, brownout protection and lockout (automatic battery connect).
- UL Listed. Complies with NEC, Life Safety Code and OSHA.
- 3-year full warranty, excluding lamps and fuses.

NOTE: For a complete list of  
 available lamp types,  
 please refer to the lamp  
 data on pages 146-147

\* Minimum lamp load required: 20% of unit capacity  
 Not available on 24V-100W Ni-Cd units  
 \*\* Standard cord is 3 ft.

Example: **KS18-2HB-AD**

## EXC Series

6 and 12 Volt – Class I, Div. 1 & 2, Groups C & D  
and Class II, Div. 1 & 2, Groups E, F & G Power Unit

TYPE: \_\_\_\_\_  
CATALOG #: \_\_\_\_\_  
NOTES: \_\_\_\_\_

### Features

- Allows mounting up to 3 hazardous area fixtures directly on the power unit or remotely.
- Corrosion-resistant, copper-free cast aluminum construction. A weatherproof gasketed spinoff cover, UL listed stainless steel vent/drain and silicone conformal coating on the circuit board protect the electronics against humidity. Comes standard with epoxy finish for added corrosion protection in harsh environments.
- Available with sealed, maintenance-free Nickel-Cadmium batteries.
- Charger offers 120/277 VAC, 60 Hz, 0.3/0.15A, 36 watt (other inputs available), fused DC output circuit, AC pilot light supervision, temperature compensation, sealed relay, low voltage battery disconnect, brownout protection, lockout (automatic battery connect), solid state, current limited, constant current short circuit proof and reverse polarity protection.
- Meets hazardous location requirements: Class I Division 1 & 2 (Groups C & D), Class II Division 1 & 2 (Groups E, F & G).
- 3-year full warranty, excluding lamps, pilot lights, and fuses.

### Fixtures

The **EXC Series** may be supplied with 1 or 2 hazardous fixtures mounted directly on the power unit and/or remotely as the application dictates (for remote fixtures, consult hazardous area fixture data sheet).

Lamp Fixtures (EP Series) See page 72: Fully directional U.L. listed copper-free cast aluminum construction, swivel-mounted, Pyrex® lens, complete with either 9, 18, or 25 watt HIT lamps (halogen optional). Available with optional guard or reflectors. Pyrex® is a registered trademark of Corning Glass.

Exit Fixtures (XP Series) See page 73: Mounted to the power unit, these exit signs are supplied standard with our unique integral transfer switch (TS) and utilize either a 6V-15W XX6 lamp or 12V-25W XX12 lamp. This enables the exit to operate in both the normal AC mode as well as DC mode. The exit sign consists of an EP fixture coupled with a heavy duty steel, baked enamel finish exit shroud with ample downlight. Supplied standard as a single face sign, red stencil faceplate; double face and green stencil also available.

For other legends, please consult your sales representative.

### Dimensions

Dimensions are approximate and subject to change.

Housing:  
12" X 12" X 9 1/2"  
(4) Mounting Lugs:  
10" and 13 1/2" on center

Overall dimensions  
(including fixtures):  
38" X 38" X 10"

Note: Dimensions are  
approximate and are  
subject to change.

### Standard Configurations for EXC Series

UNIT	CATALOG NUMBER	DESCRIPTION
 (Remote Capability)	1EXC5-0  1EXC5-TS	12 volt, 50 watt self-contained hazardous area emergency lighting power unit complete with battery and charger. (No heads)  12 volt, 50 watt self-contained hazardous area emergency lighting power unit complete with battery, charger and transfer switch. (No heads)
	1EXC5-1IG  1EXC5-1IG-TS	12 volt, 50 watt, single head unit with 12 volt, 25 watt HIT lamp. (One head)  12 volt, 50 watt, single head unit with built-in transfer switch and 12 volt, 25 watt HIT lamp. (One head)
	EXC3-2IB  EXC5-2IB-TS	6 volt, 36 watt, self-contained hazardous area emergency lighting power units complete with battery and charger. Fixture supplied with one (IB) 18 watt HIT lamp (Two heads)  6 volt, 50 watt, double head unit with built-in transfer switch and 12 volt, 25 watt HIT lamp (Two heads)
	EXC2-T1SR	6 volt, 15 watt, self-contained unit with integral low voltage transfer circuit (TS) to operate exit lamp in both normal and emergency modes. Suggested catalog number shown indicates single face exit with red stencil faceplate. For green, substitute G for R. For double face, substitute D for S. (One Exit sign)
	EXC-1HD-T1SR	6 volt, 50 watt unit. In addition to the exit lamp which operates in both normal and emergency modes, emergency lighting can be achieved with (1) additional emergency lighting head. (Example: HD = 6V-12W). (One head & one Exit sign)

Note: Above units are supplied with appropriate wattage (HIT) High Intensity Tungsten lamps (unless otherwise specified). Alternate wattages lamps or halogen lamps may be substituted as required.  
 Exit provided with 25 watt lamps only.

### How to Order

The **EXC Series** is available with a wide variety of fixtures, mountings, voltages, etc. To make your selection easier, we have listed the standard configurations in the chart above. When ordering exit fixtures, additional to the basic catalog number, you must specify single or double face and color of faceplate.  
 Insert these suffix letters at the end of model number.

## EFEP Series

### Remote Explosion-Proof Lighting Fixtures

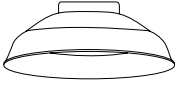

TYPE: \_\_\_\_\_  
CATALOG #: \_\_\_\_\_  
NOTES: \_\_\_\_\_

#### Features

- Available with 6, 12 and 24V lamps for DC operation or 120V AC fixtures.
- Manufactured of heavy cast aluminum with an epoxy finish and a Pyrex® lens. All attached hardware has been designed for explosion-proof applications.
- Designed for mounting in locations that are remote from the power source. If the power source is installed outside hazardous areas, the length of connection wires should be carefully considered to ensure that the voltage of the emergency power unit and the wire size of the connecting circuit are adequate to offset the voltage drop in the circuit.
- EFEPP and EFEP1, 2 and 3 fixtures include elbows swivels, a conduit extension pipe (6" increments), and a combination explosion-proof junction box/mounting plate (4" box, 6 1/4" mounting center).
- Complies with NEC, OSHA and NEMA specifications for the following Classes and Groups:
  - Class I, Division 1 & 2, Groups C & D (300W PS-25 max)
  - Class II, Division 1 & 2, Groups E, F & G (60W max)
  - Class III, Division 1 & 2 (150 watt max)
  - UL Listed for use in Paint Spray Areas (75W max)
  - Suitable for Wet Locations

Pyrex® is a registered trademark of Corning Glass.

## EFXP Series

### Explosion-Proof Remote Exit Signs

SPEC GRADE

INDUSTRIAL

#### Standard Features

- Available with 6, 12 and 24 volt lamps for DC operation or 120 volt AC fixtures
- Exits shown are explosion-proof fixtures of heavy cast aluminum construction with Pyrex® lenses. Exit housing is an 18 gauge fabricated steel box with a baked enamel finish. Stenciled exit lettering is available on one or two faces. All EFXP Series have extra large downlight openings
- EFXP units are designed for mounting in locations that are remote from the power source. If the power source is installed outside hazardous areas, the length of the connection wires should be carefully considered to ensure that the voltage of the emergency power unit and the wire size of the connecting circuit are adequate to offset the voltage drop in the circuit
- Complies with NEC, OSHA and NEMA specifications for the following Classes and Groups:  
 Class I, Division 1 & 2, Groups C & D (300W PS-25 max)  
 Class II, Division 1 & 2, Groups E, F & G (60W max)  
 Class III, Division 1 & 2 (150W max)  
 U.L. listed for use in Paint Spray Areas (75W max)  
 Suitable for Wet Locations

Pyrex® is a registered trademark of Corning Glass.

#### Mounting

The transfer circuit is not designed for use in hazardous or explosive areas. The transfer circuit is to be mounted remotely from hazardous areas.

#### Electrical Specifications for Transfer Panel

##### Input Voltage:

From AC - 120 Volt, 60Hz, 1 phase (other voltages available).  
 From DC - 6, 12, 24 or 120 Volt (select).

**Output Voltage:** Must be identical to DC Input Voltage

**Wattage:** Panel oversized 10-20% greater than total connected load.

## EverLite™ Series

### Self Luminous Exit

TYPE: \_\_\_\_\_  
 CATALOG #: \_\_\_\_\_  
 NOTES: \_\_\_\_\_

### Features

- Legend is constructed of non-glare polycarbonate, with 0.015 thick, open letters, field programmable arrows, and white letters with background colors of red or green. Contrast ratio for both conditions exceeds .5, and meets requirements of UL 924 and NFPA 101
- Constructed of rugged thermoplastic, the EverLite™ Series offers contemporary slim line design with smooth rounded corners, and a vibrant faceplate color. Frame finishes include off-white, black or gray. The entire unit is tamperproof and completely self-contained
- Tritium gas energizes the phosphor-coated borosilicate tubes in the EverLite™ sign. The low energy beta emission of tritium striking the phosphor coating inside the Pyrex® glass tubes causes illumination to be generated
- Signs mount flush to wall or ceiling surfaces, a canopy is not required.
- UL Listed. Complies with NFPA, Life Safety Code and OSHA
- EverLite™ signs are spark free and suitable for use in hazardous, explosive, corrosive, humid or any other harsh environment. Emergi-Lite® will replace free of charge any product in which the luminosity is found to be defective during its specified luminous life, or which falls below specified luminous life

Pyrex® is a registered trademark of Corning Glass.
