

ELMM Series

One compact solution for all mullion applications.

The **ELMM Series** is a compact, versatile LED lighting fixture designed for commercial applications where others struggle to fit.

Purpose-built for mullions, door frames, and other narrow architectural features, the **ELMM Series** delivers a clean, low-profile look while providing dependable illumination exactly where it's needed. Its adaptable design allows it to function as everyday lighting or emergency lighting, making it a versatile choice for both routine operation and critical moments.

**Versatile by design.
Reliable by nature.**

Key advantages

Optimized for tight mounting locations

Delivers strong performance where installation space is limited.

Clean, modern design

Low-profile housing blends seamlessly into modern commercial environments.

Flexible offering

Available in various colors and input power options (AC/DC).

Dual-purpose use

Supports both standard and emergency lighting.

Versatile environments

Suitable for indoor, outdoor, and wet locations.

Types of applications

Choosing the **ELMM Series** mullion mount means choosing a smart, space-efficient solution that delivers flexibility, consistent performance, and seamless integration across commercial applications.
